Mutual Fund Analytics Suite

An End-to-End Analytics Platform for Fund Performance, Investor Demographics, and
SIP Market Trends

Prepared by: **Kunal Ahire** | Data Analyst Intern

Executive Overview & Architecture

Project Objective

Designed and deployed an interactive 4-page Business Intelligence suite enabling fund managers to analyze macro sector trends, risk-adjusted returns, investor demographics, and systematic inflows.

Technical Architecture

Built on a robust **Star Schema Data Model** integrating PostgreSQL data pipelines, Python EDA scripts (`scipy`, `pandas`), and optimized Power BI DAX measures for real-time aggregation.
